Other Information

19. Please use this text box to provide any comments regarding the data submitted in this report (optional, no limit).

In 2016, American River College adopted a consistent college wide methodology for computing Institution Set Standards. Institution Set Standards are computed by first taking the average of the preceding 3 years (not including the current reporting year). Then a 95% Confidence Interval is constructed around the preceding 3 year average. The lower limit of this 95% Confidence Interval serves as the Institution Set Standard. Current year results are then compared to these standards.

In 2017, American River College utilized the upper limit of the 95% Confidence Interval to serve as the Stretch Goal. Current year results are then compared to these stretch goals (this methodology is reflected in the FY 16/17 reporting column for all metrics, and also in the FY 17/18 reporting column for course completion rates).

In 2019, the procedure for setting Stretch Goals for certificates, degrees, and transfers was modified to align with the California Community College Chancellor's Office Vision for Success Goals and American River College's Strategic Planning Goals. This alignment resulted in a stretch goal of a 20% increase for certificates and degrees, and a 35% increase for transfers by 2021-22 using the 2016-17 year as a baseline (this methodology is reflected in the FY 17/18 reporting column for certificates, degrees, and transfers).

Note 1: Counts for questions 6, 7, and 8 of the report reflect Fall semester counts, as requested on the input pages for those respective questions, not full year counts as indicated on the "REVIEW" page.

Note 2: Consistent with prior ACCJC annual reporting, the count of certificates and degrees reflect unduplicated counts.

The data included in this report are certified as a complete and accurate representation of the reporting institution.
