

From Jesus Valle:

I'm asking for the green light from PES to create a local Native nations tribal flag display along the grey border area in the cafeteria. We would also have a wall-mounted informational piece that explains the significance of each flag. This would be part of the campus indigenous learning platform; classes (history, art, anthro, social justice, etc) could assign their class to visit the display, read the information, and do something with the info (respond/write report/etc.).

There are three local Native nations that could contribute a flag: UAIC, Wilton Rancheria, and Shingle Springs.
