| ARC Mass Mailer System | | -There is a system that ARC IT manages with support from the district that will send a bulk mail that goes to more people than outlook but is a plain text mailer (not very elaborate, very transactional). -The only data that IT had was from April - Present -Some of our faculty coordinators, SRPSTC, learning communities have started sharing a variety of messages coming out through this system -Trying to create some parameters around this system so that students don't receive a major influx of messages so that their crucial emails are not buried under a wide variety of other mailersConcern: A students' ability to opt out of these mailers -Need to incorporate a system for who gets approval to use this system | | |
